

# Show Don't Tell!

## Virtual Product Platform

A Custom Demonstration Tool  
for Remote 3D-Model Product Presentations

*Move leads to transactions and inspire real-life trials, with remote demonstrations in a high-quality visual environment.*

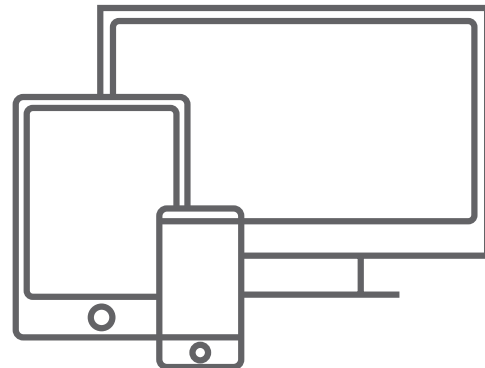

### High-Quality Display

You and your remote customers can realistically interact with your product at the same time in a pixel perfect, quality environment without the glitches and quality loss of video streaming. Equally exceptional display quality with one individual customer or thousands at the same time.

*Multi-use custom platform for sales deployment, product launches or internal product education*

### Build once, deploy anywhere

- › Custom build presentations for targeted audiences
- › Showcase complete lines, in limited exhibit space
- › Present remotely, to anywhere in the world
- › You and your audience simultaneously view interactions
- › Two-way interaction capability
- › No additional software installation
- › Works with any web browser
- › Completely secure environment protects your IP
- › Integrates with any third-party meeting platform  
Zoom, WebEx, Teams, or video broadcast

### Pixel Perfect Precision

Educate your client on the intricate aspects of your product line with a detailed 3-dimensional product demonstration

- › Rotating fully detailed 360-degree product models
- › "Hotspot" feature locations animate product functionality
- › Zoom to view the key details and your competitive IP
- › Switch to x-ray or exploded views for internal showcase
- › Animate product feature and existing video content
- › Multi-layered information capability
